CONTACT DETAILS 		OPENING TIMES 	
Address	WHITEGATE DRIVE BLACKPOOL FY3 9ES	Monday	08:00 - 20:00
Postal Locality	Blackpool	Tuesday	08:00 - 20:00
Public Phone	01253 953953	Wednesday	08:00 - 20:00
Non-Public Phone	01253 953640	Thursday	08:00 - 20:00
Fax		Friday	08:00 - 20:00
Non-Public Email		Saturday	08:00 - 20:00
Website		Sunday	08:00 - 20:00
		<i>SPECIFIED OPENING TIMES</i>	
		21-01-2022	09:00 - 13:00
		<i>PUBLIC HOLIDAY DATES</i>	
		15-04-2022	08:00 - 20:00
		17-04-2022	08:00 - 20:00

PUBLIC FACING INFORMATION 

You can go straight to this service. You do not need to telephone beforehand.

Public Name - this displays for the online user, so please enter a clear name. If the public name field is blank, it will display the service name. but may not be user friendly, as its more relevant for 111 telephony staff

Type – this does not display, but it’s important that it is accurate, as 111OL uses this to generate a user-friendly name (the alias) and description (the boilerplate) to present to the patient, eg Integrated Urgent Care (IUC) Treatment (formerly GP OOH) alias is ‘Evening and Weekend GP Call back Service’ The boilerplate text is ‘This service calls you back. You can get help from a GP outside normal working hours’. A full list of service type alias and boilerplate text is at Appendix A

ODS Code – if the service is set up for electronic referrals, an ODS code is required – this field should not be blank

Address – if the patient should attend, a full address is needed.

Public telephone number – if the patient should telephone, including Pharm+ profiles, there must be a valid telephone number entered in this field. This should not be 111, as that may put the patient in a loop.

Non- public Number, Fax, Email – are not included in 111OL returns

Website – if a website is being used (see section 2.4 for attribute details) the full URL must be added including eg https:\\ or http:\\

Public Facing Information – this does not display for patients, so is not used to advise any additional information. However, a specific text string is required to indicate the referral method. 111OL scans that field for the required text and displays the service details appropriately.

- **Telephone** – Enter *You must telephone this service before attending*
- **Electronic referral but advise to telephone first** - Enter *This service accepts electronic referrals. You should ring before you go there*. It must have a valid ITK endpoint and telephone number (currently this option is only available on emergency prescription Pharm+ profiles)
- **Electronic referral but advise to attend** - Enter *This service accepts direct electronic referrals*. It must have a valid ITK endpoint and address (currently this option is only available for CPCS minor illness profiles)
- **Go to/attend** - Enter *You can go straight to this service. You do not need to telephone beforehand*
- **Call back** – No text is required, but for your reporting, review, and filtering of service information, you may find it useful to enter ‘Call back service’ as a reference. The profile must have an ITK endpoint, and be added to the Test approved list, to enable testing. Once tested successfully, it can be added to the 111OL approved list.
- **Website** – No text is required. The profile must have the **Website Signposting** attribute, and not be on any approved list.
- **Web chat** – No text is required. The profile must have the **webchat_enabled** attribute, and not be on any approved list.

Specified Opening Times – specified opening times are recognised by 111OL, but there must also be at least one entry in the standard opening times. For profiles that are only open on specified dates, a time of at least one minute should be included in the opening times section.

2.2 Capacity Status Tab

The screenshot shows a web interface with a navigation bar at the top containing tabs: 'Demographic Details', 'Capacity Status', 'Clinical Details', 'Service Attributes', 'Endpoint Details', and 'Search'. The 'Capacity Status' tab is active. Below the tabs, the 'Capacity Status' section is displayed. It features a 'Status' section with three radio buttons: 'Green' (selected), 'Amber', and 'Red'. Below the status section is a 'Reset Time' section with a text input field and two dropdown menus.

Any changes to the capacity status will be recognised and actioned within the DoS search.

- If a service is set to RED, then the Dos will not return that service in a 111OL service search
- If a service is set to AMBER, the DoS will return it and 111OL treats it the same as GREEN status, ie available.

2.3 Clinical Details Tab

The screenshot shows the 'Clinical Details' tab with the following sections:

- SYMPTOM GROUPS**: A dropdown menu labeled 'Select a Group to view Discriminators'.
- SYMPTOM DISCRIMINATORS**: (Empty section)
- DISPOSITIONS**:
 - Refer to Treatment Centre within 1 hour(DX02)
 - Refer to Treatment Centre within 1 hour possible Viral Haemorrhagic Fever(DX021)
 - Refer to Treatment Centre within 4 hours(DX03)
 - To contact a Primary Care Service within 2 hours(DX05)
 - To contact a Primary Care Service within 6 hours(DX06)
 - Service Location Information(DX45)
 - Attend Flu treatment centre(DX68)
 - Refer to Mental Health/Crisis Service within 4 hours(DX92)
 - Emergency Contraception within 2 hours(DX97)
 - Emergency Contraception within 12 hours(DX98)
- PATIENT AGE RANGES**: 0 to 129 Years
- GENDERS**: Female, Male, Indeterminate
- ONLY RETURN IF OPEN (TRUE)**: 30 Minutes. Will only return from a search if currently open or due to open within 30 minutes.
- SERVICE REFERRALS (UNRESTRICTED)**:
 - GP - Shifa Surgery - Blackburn
 - GP - Spring-Fenisco Healthlink - Darwin
 - GP - Stepping Stone Practice - Blackburn
- REFERRAL ROLES**: Public Facing, Digital Referral (highlighted), Professional Referral

Symptom Groups / Symptom Discriminators / Dispositions – should be profiled appropriately.

- For 111 Call-back profiles (Integrated Urgent Care (IUC) NHS 111 Call Handling) with Dx32, Dx34, Dx35, Dx325, Dx327, Dx329, Dx330, a workaround SG/SD combination has been created for 111OL use
 - SG1206 NHS Pathways Inhouse Clinician
 - SD4193 PC General Health Information

Dispositions – Not all Dxs are generated by 111OL assessments, a full list of Dxs can be found at Appendix B.

- There are specific Dx codes for validation services
 - ED Validation uses Dx334 for ETC 1hr, Dx337 for ETC 4hrs, Dx338 for ETC 12 hrs
 - Ambulance Validation uses Dx333 for Cat 3 and Cat 4 Ambulance dispositions

Patient age ranges – enter relevant age range, 111OL does not assess under the under 5s. The minimum age is 5 years, and the maximum is 120 years.

Gender – 111OL does ask ‘registered sex at birth’ in the assessment, so is included in the DoS search, any exclusions will be recognised.

Only return if open – this criteria is included in the DoS search so will only return to 111OL when open or 15/30 minutes before, as per setting.

Service Referrals (Restrictions) – GP details are not collected as part of 111OL assessment, so if restricted it will not return for 111OL search.

Referral Roles – *Digital referral* must be profiled – except for ED Catchall profiles, which does not need any referral role profiled. It will return from DoS regardless.

2.4 Service Attributes Tab

SERVICE ATTRIBUTES

Before adding a Service Attribute please read the [Service Attribute Details guidance](#)

Service Attributes may be used to inform some 3rd party system behaviour so it is important to understand how and where each attribute is used before it is added or amended

Service Attributes assigned to this service

1-1 of 1

Name	Value	Status	Date Associated with Service
Website Signposting	TRUE	Active	11-12-2023 17:04

Website Signposting - Services that use a website as their primary method of referral. This attribute is available to add for services that offer a website to users for example for further information or self referral.

Best practice is to set up a separate profile for the website to be displayed on 111 online. DoS leads should confirm website validity with ICB and service leads. Processes should be agreed to validate URL's on a minimum of quarterly basis and to communicate to the ICB/DoS leads when websites are unavailable.

On 111 online, a service can only be displayed with one call to action, eg a callback, (including EP or CPCS) a place to phone, a place to go, and now a website. They will be checked in that order, and the first one it matches is how it will be displayed.

eg if the service is set up as a valid WebsiteSignposting service (and has the appropriate profiling) but the GoTo text is added to the Public Facing Information field then the service will return as a 'GoTo' service

2.5 Endpoint Details Tab

ITK Call-back Services - ITK Endpoints must be entered correctly and tested to ensure they are being received correctly in the provider system. For call-back services, the service ID must be added to the Test approved list, to enable testing. Once tested successfully, it can be added to the 111OL approved list. When testing ITK messages, a test case for each individual DX must be undertaken to ensure the message is received and configured appropriately in the provider system. Allow time for multiple tests if necessary.

ENDPOINT DETAILS

Order	Transport	Endpoint Address	Interaction	Format	Business Scenario	Comments	Compression Enabled
1	itk	https://mw0.oneoneone.nhs.uk:1880/NHS111/NHS111v2.svc	itk:interaction:primaryOutofHourRecipientNHS111C	CDA	Primary		uncompressed

Booking enabled - If a service is booking enabled, there must be an ASID endpoint. There is no requirement to add service IDs to the 111OL approved list, but local testing **must** be carried out with

the DoS Lead and Provider to ensure that the correct configuration is in place for the referral information and booking to be received successfully.

Endpoint Details							
Order	Transport	Endpoint Address	Interaction	Format	Business Scenario	Comments	Compression Enabled
1	itk	https://nw0.oneoneone.nhs.uk:1880/NHS111/NHS111v2.svc	urn:nhs-itk:interaction:primaryOutOfHourRecipientNHS111CDADocument-v2-0	CDA	Primary		uncompressed
2	itk	https://eddi.oneoneone.nhs.uk/	urn:nhs-itk:interaction:primaryEmergencyDepartmentRecipientNHS111CDADocument-v2-0	CDA	Primary		uncompressed
3	http	ASID:200000023978	scheduling	FHIR	Primary		uncompressed

Email endpoints - 111OL only accepts and actions electronic referrals for ITK endpoints, email endpoints are not accepted, except for Dental Services in some areas, which is enabled for specific dental DXs only.

2.6 Search Rankings Tab

Demographic Details	Capacity Status	Clinical Details	Service Attributes	Endpoint Details
SEARCH RANKING DETAILS				
Ordering Type				
<input type="radio"/> No Effect - Search results will not change <input type="radio"/> Promote - This service will appear higher in results for these areas <input checked="" type="radio"/> Limit - This service will only appear in results for these areas				
This service will only appear in search results for patients in the following areas				
Commissioning Organisations				
LAD: Rossendale				
NHS Bury CCG				

The promote and limits entries are recognised and actioned within the DoS search, based on the postcode sent from 111OL, the appropriate services will return in the relevant ranking order to 111OL, based on the profiling and the ranking order included in the relevant ranking section of the Commissioning Organisation's profile, (ie SUB-ICB or LAD (Local Authority District). Detailed in the clinical tab of the profile.

RANKING	
1 (Highest)	Emergency National Response Sexual Assault Referral Centre (SARC) Pharmacy Pharmacy Distance Selling Pharmacy Enhanced Hospital Streaming
2	Community Based Health Visitor Pharmacy Urgent Medicines Supply Mental Health Health Information Safeguarding Optical Optical Enhanced Specialist

If a profile has referral by ITK Call-back and is limited to SUB-ICB(s), that must be added to the approved list for all those relevant SUB-ICBs, or it could be suppressed from presenting.

NOTE: Although profiles can be limited to smaller areas (eg LAD, LDA) that are recognised in the DoS service search, the approved list is SUB-ICB based and profiles can't be linked to more granular geographic boundaries, ie Locally defined areas (LDA) or Local Authority Districts (LAD).

Example - An ITK call-back service is limited to Wirral SUB-ICB and Neston LDA (within West Cheshire SUB-ICB)

The service ID will need to be on the approved list for both Wirral SUB-ICB and West Cheshire SUB-ICB – but Dos will ensure that it will only return for patients currently located in the Neston LDA postcode area, not the whole West Cheshire area.

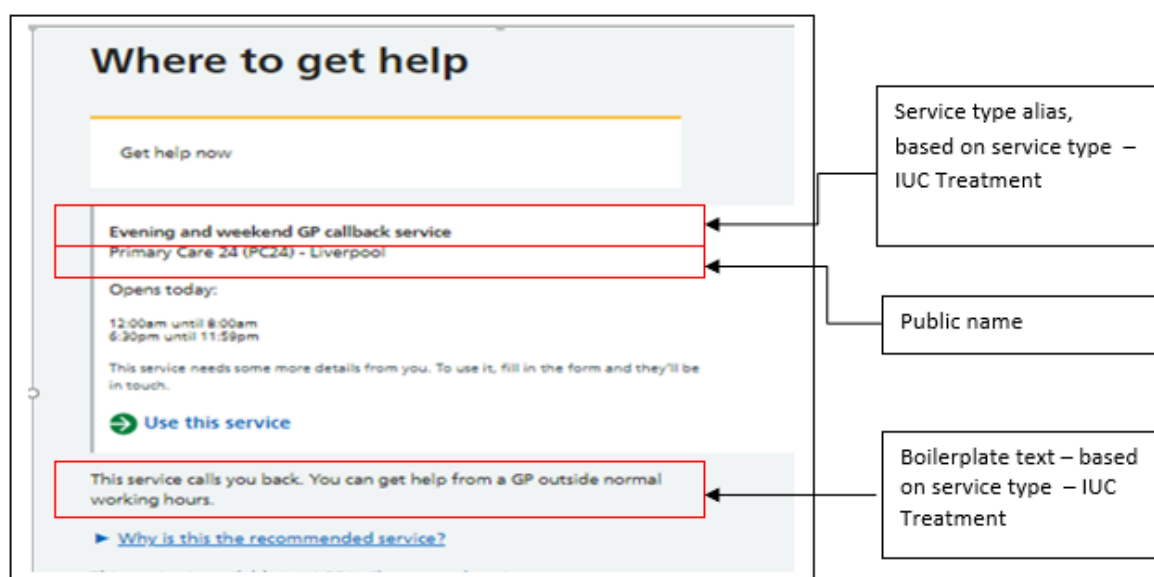

Search Distance – The search distance parameters for each SUB-ICB postcode area are used in the DoS search, that may be the national default of 60km (37 miles) or bespoke locally agreed distances. 111OL does not use any distance filters.

3 111OL business rules

The online service applies its own filtering and cosmetic updates to the raw results from DoS to ensure they are appropriate for online users, these rules have cosmetic outcomes, and filtering and suppressing services.

3.1 Cosmetic

- Service type alias and boilerplate details are added to each service, which provides online suitable names and descriptions for the services returned.
- Open and closing times are parsed and formatted for presentation online

3.2 Filtering

- Certain dispositions are configured to restrict the service types that are returned so Dental dispositions for instance will filter out any GPs in the result set
- ED Catchall returns are suppressed for PC dispositions during the in hours period and for dental dispositions at any time
- No DoS results are shown for Dx38, Dx39 and Dx46
- DoS results for Dx09, Dx10, Dx16, Fx75 are only shown for Pharmacy Enhanced service type for CPCS minor illness.
- GP OOH (Integrated Urgent Care (IUC) Treatment) returns are suppressed from 08:00 to 18:00, unless there is a specified opening time set for in-hours cover, GP training etc.
- GP OOH (Integrated Urgent Care (IUC) Treatment returns and ED catchalls are suppressed when the disposition safely goes into the GP in hours period, for example:
 - A 24hr Dx would not return on a Sunday morning, as GPs open Monday (excl BH)
 - A 12hr Dx would not return at midnight on a weekday, as GPs open at 08:00
- When DoS returns are 'go to' referral, and no address is present, the service will not present
- When DoS returns are 'telephone' referral, or a 'ITK Ring and go' for emergency prescriptions, and no public number is included, the service will not present.
- When DoS returns an 'ITK call back' referral and it is not on the ITK approved list, linked to the current location SUB-ICB, the service will not present.
- If a service set up for call back is not open NOW, it will be filtered out (to prevent calls going into unmanned queues when closed)
- When DoS returns a call-back service, for the following dispositions, other services that are set up as telephone or go to services will not be presented – only the call-back option will be presented.
 - Clinical Callback – Dx32, Dx34, Dx35, Dx325, Dx327, Dx329, Dx330
 - Validation – Dx333, Dx334, Dx337, Dx338
 - Covid - Dx1112, Dx1113, Dx1115, Dx1116, Dx1117

3.3 Order of returns

Default screens based on Dx – For several dispositions (inc primary care and lower acuity), a default screen will present initially advising users to contact specific service types

- Contact Pharmacy – Dx28
- Contact Dentist – Dx17, Dx18, Dx19, Dx20, Dx21, Dx22
- Contact GP - Dx05, Dx06, Dx07, Dx08, Dx11, Dx12, Dx13, Dx14, Dx15
- Contact Midwifery Dx30, Dx50, Dx51
- Contact Optician – Dx60
- Sexual Assault Referral Centre (SARC) – Dx94

The advice on these screens will depend on the disposition time. Eg Contact GP now, or today, or tomorrow, Contact pharmacy today or tomorrow, etc. The outcome for each Dx is listed on Appendix B. If there are also services returned from DoS search, they will be available to view on the optional 'see other things you can do' link. When that link is selected, the DoS returns will be displayed in the appropriate ranking order.

GP Trumping - overriding the primary care default page, with a DoS service return.

This is activated in the out of hours period, and in-hours if specified opening times are used for GP cover, but only if the **first** return from DoS is 'Integrated Urgent Care (IUC) treatment' type.

- The initial primary care message to contact GP is overridden and displays the IUC Treatment (GP OOH), but also has the 'see other things you can do' option for other available services, that are profiled and return from DoS, WIC or UCC etc.
- If two 'IUC Treatment,' only one will 'trump' the default screen and the other will be in the 'other service' page.
- If other service types are first on DoS return, eg UTC/UCC etc, the override will not be actioned. The primary care default screen will display but will have the 'see other things you can do' link to other services.

3.4 Scenario Testing

A DoS Direct Link Testing Tool (DDL) is updated with each Pathways release and is available on the 111OL Microsite, at Tools section - [NHS 111 online resources](#).

This spreadsheet has links to preset SG/SD combinations for each Disposition (DX) available for online assessments. The postcode and day/time can be entered to run specific scenarios, to check for results real-time or a future day/time.

NOTE: If the date/time entered is in the past, the search will be generated real time and base the search on 'now'.

Some DX have two links

- Dispositions – will display the page presented to users at the required date/time
- DoS results – will display the DoS results that would be presented if the 'other services link' was selected, at the required date/time

NOTE: If the 'other services' link is selected on the 'dispositions' link, it will display other services real time and not at the future date/time.

For validation services, there are three links available

- Validation - If you use this and there is nothing profiled for the validation DX code, you will see recommended service page
- Recommended Service – will return services profiled for DX02 (non validation code)
- Other services - If you use this and there are no 'other services', you will either see the A&E interstitial page (if booking enabled for first service), or the recommended service page again.

Enter Postcode	Select DoS Environment	DoS Disposition link
pr2 1tn	live	Dx011 - Emergency Ambulance Response (Red 2)
Hours	Minutes	Dx012 - Emergency Ambulance Response (Category 3)
15	00	Dx013 - Assistance needed at home due to inability to get off the floor
Date	Month	Dx016 - Non-emergency Ambulance Response
15	03	Dx0162 - Transport to an Emergency Treatment Centre within 1 hour
Year		Dx0121 - Emergency Ambulance Response (Category 3)
2022		Dx0122 - Emergency Ambulance Response (Category 3)
		Dx0127 - Emergency Ambulance Response, Pregnancy (Category 3)
		Dx0126 - Emergency Ambulance Response for Trauma Emergency (Category 3)
		Dx01213 - Emergency Ambulance Response for Accidental Poisoning (Category 3)
	Validation*	Dx02 - Attend Emergency Treatment Centre within 1 hour
	Recommended Service	Dx02 - Attend Emergency Treatment Centre within 1 hour
	Other Services**	Dx02 - Attend Emergency Treatment Centre within 1 hour
	Validation*	Dx03 - Attend Emergency Treatment Centre within 4 hours
	Recommended Service	Dx03 - Attend Emergency Treatment Centre within 4 hours
	Other Services**	Dx03 - Attend Emergency Treatment Centre within 4 hours
	Disposition	Dx05 - To contact a Primary Care Service within 2 hours
		Dx05 - To contact a Primary Care Service within 2 hours

Appendix A

A full list of service type alias and boilerplate text

Note – any service that has Website Signposting attribute applied will have ‘Online’ added before the service type alias. Eg Mental health service will be shown as Online Mental health service

Service Type (Dos)	Service Type (Alias)	Service Type (boiler plate description)
Acute Assessment Unit	Same day assessment unit	This is where patients have symptoms urgently checked by senior nurses or consultants. You get a diagnosis and you’ll either be sent home that day or admitted to a ward in the hospital. It is not the same as A&E, but usually a part of it.
Community Hospital		Community hospitals offer things like blood tests, minor injuries, sexual health services, dental services, therapy and rehabilitation and child health.
Dental Domiciliary	Dentist home visit	This dentist will come to your home or a care home.
Dental Emergency	Emergency dentist	Emergency dentists treat serious bleeding and swelling in the mouth. Sometimes you need to book a call back with them first. They can usually prescribe painkillers for severe pain.
Dental Service	Dentist	
Emergency Department (ED)	A&E (accident and emergency)	A&E is for critical or life-threatening injuries or illnesses. Also known as the emergency department or casualty. You should get someone to take you there if you can and bring all current medicines with you.
Emergency Department (ED) Eye Casualty	Eye emergencies	This hospital offers specialist emergency services for urgent eye problems. You should get someone to take you there if you can and bring all current medicines with you.
Emergency Department (ED) Specialist	A&E (accident and emergency) (child) or (adult)	A&E is for critical or life-threatening injuries or illnesses. Also known as the emergency department or casualty. You should get someone to take you there if you can and bring all current medicines with you.
GP Access Hub	Local GP centre	Local GP centres offer extra daytime, evening and weekend GP appointments in the local area, even if you're registered with another GP.

Service Type (Dos)	Service Type (Alias)	Service Type (boiler plate description)
Integrated Urgent Care (IUC) Treatment	Evening and weekend GP call-back service	This service calls you back. You can get help from a GP outside normal working hours. <i>(This only displays if the service is set up as a call-back service. If it's a place to phone, the number will display - if that number is 111, its not a good patient journey as it can lead to the patient being in a loop if they get the telephony automated message to contact online.</i>
Integrated Urgent Care (IUC) Clinical Assessment Service (CAS)	Call back from a nurse	This is a service where you book a call with a nurse. They will know what you have answered so far and then ask you more questions to see what you should do next.
Integrated Urgent Care (IUC) NHS 111 Call Handling Provider	Call back from a nurse	This is a service where you book a call with a nurse. They will know what you have answered so far and then ask you more questions to see what you should do next.
Mental Health	Mental health service	This is a service with trained mental health specialists. They'll tell you if you need immediate help, or how to get longer term mental health support near you.
Optician	Optician	
Optician Domiciliary	Optician home visit	This is an optician that can see you in your home or care home.
Optician Enhanced Service	Specialist optician	This is a local optician who works with the NHS and can provide a higher level of investigation.
Pharmacy	Pharmacy	A pharmacist can help with a wide range of minor health problems. You can have a consultation in a private room. Pharmacists can provide emergency prescriptions for some medicines that you're prescribed regularly.
Pharmacy Clinical Assessment Service (CAS)	Callback from a pharmacist	A pharmacist can help with a wide range of minor health problems over the phone. They can tell you what to do next if you need to see someone.
Pharmacy Enhanced Service	Pharmacy with consultation service	A pharmacist can help with a wide range of minor health problems. You can have a consultation in a private room. Pharmacists can provide emergency prescriptions for some medicines that you're prescribed regularly.
Pharmacy Urgent Medicines Supply	Emergency prescription service	These pharmacists can provide an emergency supply of some medicines that you are prescribed regularly.

Service Type (Dos)	Service Type (Alias)	Service Type (boiler plate description)
Sexual Health	Sexual health service	Sexual health services provide contraception, testing and treatment for sexually transmitted infections (STIs), pregnancy advice and testing and help with sexual problems. Sexual assault referral centres offer confidential help and medical care.
Specialist Service	Specialist service	
URGENT CARE	Urgent care	Urgent care services (also known as walk-in centres or minor injuries units) can deal with a range of problems like rashes, minor injuries, emergency contraception, infections, sprains, cuts and bruises, and wound dressing.
Urgent Treatment Centre (UTC)	Urgent treatment centre	Urgent treatment centres are overseen by GPs. They're open for at least 12 hours every day. They can diagnose and deal with many of the most common problems people go to A&E for.

Appendix B

Dispositions currently supported

Disposition code	Description in NHS Pathways system	Instructions on screen
999		
Dx01010	Emergency Ambulance Response for Pre-arrest Anaphylaxis (Category 1)	Phone 999 now for an ambulance
Dx011	Emergency Ambulance Response (Category 2)	Phone 999 now for an ambulance
Dx0111	Emergency Ambulance Response for Acute Abdomen Pregnant (Cat 2)	Phone 999 now for an ambulance
Dx0112	Emergency Ambulance Response for Acute Coronary Syndrome (Cat 2)	Phone 999 now for an ambulance
Dx0113	Emergency Ambulance Response for Anaphylaxis (Cat 2)	Phone 999 now for an ambulance
Dx0114	Emergency Ambulance Response for Aortic Aneurysm Rupture/Dissection (Cat 2)	Phone 999 now for an ambulance
Dx0115	Emergency Ambulance Response for Labour Complications (Cat 2)	Phone 999 now for an ambulance
Dx0117	Emergency Ambulance Response for Possible Stroke Time Critical (Cat 2)	Phone 999 now for an ambulance
Dx0118	Emergency Ambulance Response for Potential Shock (Cat 2)	Phone 999 now for an ambulance
Dx01120	Emergency Ambulance Response for Respiratory Distress Trauma (Cat 2)	Phone 999 now for an ambulance
Dx01121	Emergency Ambulance Response for Septicaemia (Cat 2)	Phone 999 now for an ambulance
Dx01125	Emergency Ambulance Response for Potential COVID19 (Category 2)	Phone 999 now for an ambulance
Dx012	Emergency Ambulance Response (Category 3)	Phone 999 now for an ambulance
Dx0121	Emergency Ambulance Response (Category 3) Transport AT	Phone 999 now for an ambulance
Dx01213	Emergency Ambulance Response for Accidental Poisoning (Category 3)	Phone 999 now for an ambulance
Dx01214	Emergency Ambulance Response for Potential COVID19 (Category 3)	Phone 999 now for an ambulance
Dx0122	Emergency Ambulance Response (Cat 3) to assess a patient face to face	Phone 999 now for an ambulance
Dx0124	Emergency Ambulance Response for Risk of Suicide (Category 3)	Phone 999 now for an ambulance
Dx0126	Emergency Ambulance Response for Trauma Emergency (Cat 3)	Phone 999 now for an ambulance

Disposition code	Description in NHS Pathways system	Instructions on screen
Dx0127	Emergency Ambulance Response, Pregnancy (Category 3)	Phone 999 now for an ambulance
Dx013	Assistance needed at home due to inability to get off the floor (Cat 4)	Phone 999 for an ambulance
Dx016	Non-emergency Ambulance Response (Cat 4)	Phone 999 for an ambulance
Dx0162	Transport to an Emergency Treatment Centre within 1 hour (Cat 3)	Phone 999 now for an ambulance
Dx49	999 for police	Phone 999
ED		
Dx02	Attend Emergency Treatment Centre within 1 hour	Where to get help Get help now If no DoS results: Go to accident and emergency (A&E)
Dx03	Attend Emergency Treatment Centre within 4 hours	Where to get help Get help as soon as you can If no DoS results: Go to accident and emergency (A&E)
Dx89	Attend Emergency Treatment Centre within 12 hours	Where to get help Get help today If no DoS results: Go to accident and emergency (A&E)
Dx92	Refer to Mental Health/Crisis Service within 4 hours	Where to get help Get help now
Dx94	Attend Emergency Treatment Centre within 1 hour for Sexual Assault Assessment	Get help as soon as you can (change 376)
Primary care		
Dx05	To contact a Primary Care Service within 2 hours	Contact your GP now
Dx06	To contact a Primary Care Service within 6 hours	Contact your GP as soon as you can, today
Dx07	To contact a Primary Care Service within 12 hours	Contact your GP today
Dx08	To contact a Primary Care Service within 24 hours	Contact your GP today or tomorrow
Dx11	Speak to a Primary Care Service within 1 hour	Contact your GP now
Dx12	Speak to a Primary Care Service within 2 hours	Contact your GP now
Dx13	Speak to a Primary Care Service within 6 hours	Contact your GP as soon as you can, today
Dx14	Speak to a Primary Care Service within 12 hours	Contact your GP today
Dx15	Speak to a Primary Care Service within 24 hours	Contact your GP today or tomorrow
Dx10	MUST contact own GP Practice for a Non-Urgent appointment	Book a non-urgent GP appointment
Dx75	MUST contact own GP Practice within 3 working days	Contact your GP within the next few days

Disposition code	Description in NHS Pathways system	Instructions on screen
Dx28	Contact Pharmacist within 24 hours	Contact a pharmacist today or tomorrow
